

## The Air and Space 18A Gyroplane

The Air and Space 18A is one of only three gyroplanes to have received an FAA Standard Airworthiness Certificate since the Second World War. Designed in the late 1950s - early 1960s, the Air and Space 18A was the brainchild of fertilizer manufacturer and distributor Ray Umbaugh who considered gyroplanes an ideal, inexpensive means of increasing the efficiency of his sales force.

**Directions:** Hwy 101, exit San Martin Ave, go west one short block, (from 101 south bound, a very short block) to Murphy Ave, south on Murphy, around the west of E16, look for a sign of the Museum. Overflow parking on Murphy Ave.

### A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
